

Milling

# Universal Milling System

- Highly productive
- Saves space
- Reduces capital expenditure

## Universal Milling System

Dec's Jetpharma Universal Milling System provides the ultimate in flexibility, taking up the minimum area for the maximum product recovery. Its easily accessible interchangeable grinding media mill from 500 to 15 microns at an adjustable speed up to 500 kg per hour

The **UMS** is available in a contained through the wall version, inert if required, in a variety of materials, appropriate to the product to be milled, with bottom or side discharge. It is also fully scaleable, from lab scale to suit a wide variety of production purposes.

The **UMS** is compliant for ATEX, fully CE marked and is available with full PLC control.

### Features:

- Scaleable
- Flexible
- Multiple applications
- Particle size control
- UMS compliant
- CE marked
